Commercial

Team Introduction + Roles

Conner Williams: *Front-end / View Developer*

- Focuses on creating the visual and interactive model that the user will interact with.

Everett Stone : *Back-end / Model + Controller Developer*

- Focuses on creating and managing the data that is being moved and transferred behind the scenes.

Maksim Sharoika: *Full-stack Developer / Project Manager*

- Works as leader and intermediary between the two development groups to help keep the groups on track and making sure progress is being made.

Purpose of Project

Project Idea:

- The purpose of our project is to promote awareness and knowledge regarding the many species of mushrooms available to the general public and available in the wild. (Information such as appearance, location, benefits, and potential hazards of certain mushroom species.)

Why ShroomBase?

- In the seventeen years from 1999 to 2016, there have been 133 700 cases of mushroom poisoning with 704 resulting in serious harm and 52 resulting in death. We believe the majority of these injuries could have been prevented with better access to information and knowledge of mushrooms, their risks, and their appearances.

Quick Look At ShroomBase

- Our project is an Online Resource that contains facts, locations, and dangers of mushrooms.

Quick Look At ShroomBase

- The mushroom details page provides the information about various types of mushrooms
